Skills

Programming Languages: Python, JavaScript, SQL

Tools & Frameworks: JIRA, Charles, Fiddler, FastAPI, Git & Github, TCP/IP, OSI Model, Linux Fundamentals

Projects

InvyTrack – Inventory Management System

[\(Link\)](#)

Technology Used: Angular, Jsonserver, Material UI, Tailwind

- An application built to manage inventory for products, categories, and stock levels implemented CRUD operations.
- Enhanced the UI with the Material UI library and Tailwind CSS to deliver a responsive, intuitive, and visually appealing interface.
- Incorporated search and filtering capabilities to enable efficient navigation of specific products from large datasets.

DiagnoAI – AI-Powered Medical Diagnosis Tool

[\(Link\)](#)

Technology Used: Python, Streamlit, FastAPI, Gemini-API

- DiagnoAI is a prototype tool that helps people diagnose medical conditions on the go, even if they have a non-medical background, by querying symptoms.
- The implementation consists of a FastAPI backend integrated with Google Gemini to process user queries and generate structured JSON responses by using a prompt template.

Experience

Software Test Engineer, Vidyamantra Edusystem Pvt. Ltd. – NSEZ

December 2025 – Present

- Developed and executed test cases for an in-house SaaS application, validated SQL queries for data integrity, and performed performance testing using JMeter.
- Utilised Charles Proxy and Fiddler to monitor, analyse, and modify network traffic for verifying server-side validations and configured virtual hosts on Linux systems for web hosting.
- Collaborated cross-functionally with development teams on business decisions during the SaaS application lifecycle, ensuring product reliability and quality.

QA Intern, A1QA – Remote

September 2025 – November 2025

- Performed complete functional testing on web, desktop, and Android applications, ensuring compliance with the business requirements.
- Utilised Charles Proxy and Fiddler to monitor, analyse, and modify network traffic for verifying the validation on the server side.
- Tracked defects in Jira, maintaining detailed and reproducible bug reports, and also designed test survey and acceptance sheet documentation based on functional requirements.

Research Intern, CDAC – India, Pune

Jun 2024 – Aug 2024

- As part of the project, our team needed a diverse Urdu language corpus to train an ASR model; existing datasets lacked sufficient diversity in linguistic styles and contexts.
- Led the creation of the Urdu corpus, strategically sourcing text from social media, books, and other relevant resources.
- Leveraged Python and Pandas to clean, preprocess, and structure the data for further processing and implemented a pipeline to ensure consistency.

Education

Bharati Vidyapeeth University College of Engineering, Pune – B Tech in Computer Engineering

August 2025

Galgotias University – Diploma in Computer Engineering

May 2022
